Projects

AI-Powered Resume Screening System

- Developed an AI-powered resume screening system to automatically analyze resumes and evaluate candidate suitability against specific job descriptions.
- Built scalable backend services and RESTful APIs using Spring Boot for secure resume upload, candidate data management, and screening operations.
- Implemented resume text extraction and NLP-based skill matching to identify relevant skills, experience, qualifications, and missing job requirements.
- Designed a candidate ranking and scoring mechanism to generate resume–job match percentages and assist recruiters in shortlisting candidates efficiently.
- Integrated a React.js frontend with Spring Boot backend APIs to provide an interactive resume upload, screening, and results dashboard.
- **Technologies Used:**Java, Spring Boot, Spring AI, React.js, MySQL, REST APIs, NLP, Git/GitHub.

Training

Full Stack Java Development
Bapuji Institute of Engineering and Technology (10 Days)

Certification

Java Foundation Certificate – Infosys **Dec 2024**

Achievements

- Participated in Gen AI and Agentic AI Hackathon.
